PROFESSIONAL SUMMARY

AI/ML Engineer with expertise in building production-ready machine learning systems, LLM-powered applications, and end-to-end data pipelines. Proven track record in fraud detection, recommendation systems, and predictive analytics with hands-on experience deploying scalable AI solutions. Strong foundation in Python, deep learning frameworks, and full-stack development.

EDUCATION

Panipat Institute of Engineering and Technology
Bachelor of Technology in Computer Science (AI & ML)

Panipat, India
Aug 2022 – Present

- CGPA: 7.1/10 — Relevant Coursework: Machine Learning, Deep Learning, Data Structures, Algorithms

Arya Senior Secondary School
Higher Secondary (Non-Medical) - 93%

Panipat, India
Mar 2021 – Jun 2022

TECHNICAL SKILLS

Languages: Python, PostgreSQL

ML/AI Frameworks: Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, Seaborn, OpenCV, LangChain

Tools & Platforms: Git, Docker, FastAPI, VS Code, Google Colab, Jupyter, Power BI, AWS/Cloud

Databases: MySQL, Vector Databases (Semantic Search)

Core Competencies: Machine Learning (Regression, Classification, Clustering, Random Forest), Deep Learning, LLM Integration, NLP, Data Pipelines, Model Deployment, API Development,

PROFESSIONAL EXPERIENCE

Data Science Intern
Grades Global

Jul 2024 – Aug 2024
Remote

- Built predictive models achieving 91% accuracy for business forecasting using ensemble methods (Random Forest, XGBoost), enabling data-driven decision making for stakeholders
- Created interactive Power BI dashboards visualizing key business metrics

Machine Learning Intern
Imarticus Learning

Jul 2023 – Aug 2023
Remote

- Collaborated in agile teams to develop ML-powered solutions, conducting code reviews and implementing best practices for model versioning and reproducibility

KEY PROJECTS

SHL Assessment Recommendation Engine | *Python, LangChain, Vector DB, FastAPI*

Dec 2025

- Architected an intelligent recommendation system using semantic search and LLM re-ranking to match candidates with optimal SHL assessments, improving placement accuracy by 35%

AI Voyage Estimation & Decision System | *Python, FastAPI, MCP, Rule-based AI*

Dec 2025

- Developed rule-based AI system for maritime voyage profit/risk estimation
- Built modular decision-making pipeline integrating multiple data sources (weather, fuel costs, port fees) to optimize route selection and reduce operational costs by estimated 18%

Credit Card Fraud Detection System | *Python, Scikit-learn, Deep Learning, Flask*

Ongoing

- Designed AI-powered fraud detection system using ensemble learning and neural networks, achieving 97% precision and 94% recall on imbalanced dataset of 284K transactions

CERTIFICATIONS & ACHIEVEMENTS

Certifications: HTML, C++, C Training (Spoken Tutorial, IIT Bombay) — Power BI Basics (Udemy)

Achievements: Solved 250+ problems on LeetCode demonstrating strong problem-solving and algorithmic skills

Activities: Active participant in college technical quizzes — Contributor to open-source ML projects
